SUMMARY

Senior Software Engineer with 6+ years of experience building scalable backend systems using Java, Spring Boot, Microservices, RabbitMQ, PostgreSQL, Redis, Docker, Kubernetes, and AWS. Experienced in designing event-driven architectures, authentication systems, notification platforms, appointment management systems, and enterprise-grade REST APIs. Strong expertise in cloud-native development, distributed systems, performance optimization, and end-to-end product delivery from design to production deployment.

EXPERIENCE

Senior Software Engineer, Mag Solutions FZCO, Dubai *Sep 2025 – Present*

- Architected a visa appointment platform (Spring Boot, PostgreSQL, React) processing 4-5k bookings/day across 20 countries.
- Designed slot management and OTP-verified booking with idempotent APIs, preventing double-booking at 10k concurrent users.
- Implemented RBAC with Keycloak (OAuth2/OIDC, JWT) across 12 microservices.
- Built RabbitMQ email/OTP pipelines with retries and dead-letter queues, delivering 100k messages/day.
- Integrated Payfixy and multiple partner APIs; generated barcode-enabled PDF confirmations.
- Deployed services on AWS (EKS, EC2, S3, ECR, CloudWatch) with Docker and Kubernetes at 99.9% uptime.

Software Engineer, Leegality *Mar 2022 – Sep 2025*

- Led backend development of a multi-tenant notification platform serving 5 business units and 100k+ emails/month.
- Designed event-driven microservices with RabbitMQ for asynchronous workflows, improving throughput by 99.8%.
- Added Redis caching and Redisson distributed locks, cutting 97% latency from 99 ms to 5 ms and removing duplicate jobs.
- Built an OpenAI-powered support chatbot with ticket escalation, deflecting 80% of first-level tickets.
- Delivered Excel/PDF reporting modules (Apache POI, iText) used by 100+ enterprise clients.

Software Engineer, Yash Technologies *Nov 2021 – Mar 2022*

- Developed Spring Boot microservices and REST APIs for a food delivery platform (ordering, payments, tracking).

Full Stack Developer, Cognizant Technology Solutions *Jul 2020 – Nov 2021*

- Built enterprise web applications with Java, Spring MVC, Spring Boot, Hibernate and Angular in an Agile team.

PROJECTS

VIP Protection Portal | Python, FastAPI, OpenCV, MediaPipe

- Built a passport photo validation engine (face detection, head-pose and background checks).

SKILLS

Languages: Java 17+, Python, SQL

Backend: Spring Boot 3, Spring Cloud, Spring Security, Spring Data JPA, Hibernate, REST, gRPC, Microservices

Messaging & Data: RabbitMQ, Kafka, PostgreSQL, MySQL, Redis, Redisson

Cloud & DevOps: AWS (EC2, S3, IAM, EKS, ECR, CloudWatch), Docker, Kubernetes, CI/CD, Maven, Git

Security: Keycloak, OAuth2, OpenID Connect, JWT, RBAC

AI: OpenAI APIs, LLM integration, Generative AI

Testing: JUnit 5, Mockito, Postman

Frontend: React, Angular (working knowledge)

EDUCATION

B.Tech, Computer Science and Engineering, DIT University *Aug 2016 – Jul 2020*
